

A wealth of wonderful parks are on offer as locations for possible events. Warwick District Council is very proud of its parks and open spaces and these are carefully managed by the WDC Green Spaces team. When used for events, it is hoped that there will be no damage to these important community spaces. We will arrange a site visit with WDC's Green Spaces team. The aim of this is to discuss protection of the site during both the event, and in the setup and take-down of all equipment.

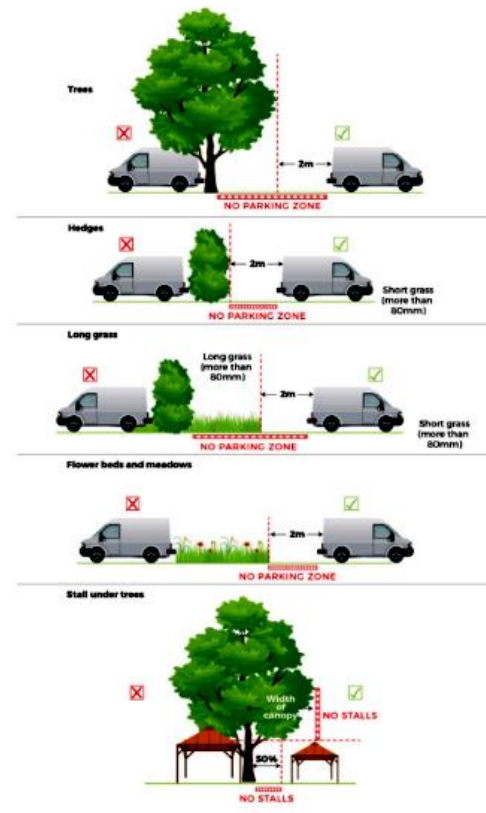

Event Organisers are responsible for putting preventative measures in place to eliminate and minimise foreseeable damage, including wet weather contingencies. You will discuss this further with your Events Officer during the planning of your event. Event sites will be signed over to event organisers on the first day of tenancy and then a site inspection will take place on the last day of tenancy to assess for any damage.

## Fields - Events site plan

**Scheduled Ancient Monument - s apply.**  
 Access route. No other paths  
 Vehicles under 3.5 tonnes only  
 Required between paths and grass
